

LAKSHAY NAGPAL

Full-Stack Software Engineer

+91 83959 91957 | lakshayn0001@gmail.com | India (Immediate Joiner / 0 Days Notice)

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2.8 years of enterprise experience delivering scalable web applications, robust backend services, and automated deployment pipelines. Proficient across TypeScript, React.js, Next.js, Node.js, PostgreSQL, and Docker, with a demonstrated record coordinating 50+ production builds across 15+ environments to sustain 99.5%+ uptime. Experienced in architecting real-time event-driven systems, engineering secure REST APIs, and optimizing database schemas to deliver reliable, production-grade solutions.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript (ES6+), SQL, Python, HTML5, CSS3
Frontend:	React.js, Next.js (App Router), Tailwind CSS, Redux Toolkit, Chart.js
Backend:	Node.js, Express.js, RESTful APIs, JWT Authentication
Databases & ORM:	PostgreSQL, Prisma ORM, MongoDB, Mongoose
Real-Time & AI:	Socket.IO, WebSockets, Google Gemini AI API
DevOps & Tools:	Docker, Kubernetes (K8s manifests), Git, GitHub, Postman, Linux, VS Code

PROFESSIONAL EXPERIENCE

Open Access Technology India Pvt. Ltd. (OATI)

Apr 2023 – Jan 2026

Software Developer – Integration

[Experience Letter](#)

- Automated and orchestrated application deployment workflows across 15+ distributed enterprise server environments, reducing manual rollout overhead by approximately 40% across scheduled release cycles.
- Governed end-to-end release lifecycles across 50+ production builds, executing pre-release validation protocols and environment health checks to sustain 99.5%+ post-deployment system availability.
- Authored and executed 100+ transactional SQL validation routines and schema migration scripts to verify database connectivity, mitigate schema drift, and safeguard production data integrity.
- Conducted root-cause analysis on critical release blockers by interrogating system logs and backend REST API payloads, reducing mean time to resolution (MTTR) by approximately 30%.

Geekster

Jan 2022 – Jun 2022

Intern Teaching Assistant Engineer

[Certificate](#)

- Mentored a cohort of 40+ aspiring software developers in core frontend engineering (JavaScript, React.js, HTML5, CSS3), achieving an 85%+ curriculum assignment completion rate.
- Facilitated 25+ technical debugging sessions, guiding developers through algorithmic optimization, state management, REST API consumption, and modular component reusability.

SELECTED PROJECTS

Real-Time Chat Application

[GitHub](#) | [Live Demo](#)

Next.js 16 (App Router), TypeScript, Node.js, PostgreSQL, Prisma ORM, Socket.IO, WebSockets, Docker

- Architected a high-concurrency real-time messaging platform with WebSockets and Socket.IO, achieving sub-100ms bidirectional delivery, active room presence, and resilient socket reconnection.
- Engineered an optimized PostgreSQL database schema with Prisma ORM, utilizing indexed relational queries for sub-50ms message retrieval; containerized application services using Docker.

AI Data Analytics Dashboard

[GitHub](#) | [Live Demo](#)

React.js, Node.js, Express.js, MongoDB, Mongoose, Google Gemini AI API, Chart.js, Tailwind CSS

- Engineered an AI analytics platform using the Google Gemini API to dynamically generate and execute MongoDB queries from natural language, cutting manual analytical querying time by 80%.
- Built modular RESTful APIs with Node.js and Express.js, integrating Multer for stream-based file processing and Chart.js to render 6+ interactive, exportable analytical visualizations.

EDUCATION & ACADEMIC QUALIFICATIONS

Maharshi Dayanand University (MDU Rohtak)

2019 – 2023

Bachelor of Technology (B.Tech) in Computer Science & Engineering

70.56% (First Division) | CGPA: 7.2/10

CERTIFICATIONS

React JS Developer Certificate

[View Credential ↗](#)
