SUMMARY

Software Developer with 2.5+ years at OATI in enterprise integration: SQL data validation, REST API troubleshooting, Linux log analysis and deployments across multiple environments. Builds full-stack applications in personal projects with React, Next.js, Node.js, TypeScript and PostgreSQL, including a real-time messaging app (Socket.IO, Docker, Kubernetes) and an AI-assisted data analytics dashboard. Targeting Full-Stack, Backend or Software Engineer roles in Germany.

TECHNICAL SKILLS

Used professionally (OATI): SQL, REST API troubleshooting, Git, Linux / Bash, release and deployment tooling

Project and internship experience:

- **Languages:** JavaScript (ES6+), TypeScript, Python
- **Frontend:** React.js, Next.js (App Router), HTML5, CSS3, Tailwind CSS, Chart.js
- **Backend:** Node.js, Express.js, REST APIs, Socket.IO / WebSockets, NextAuth (Auth.js), JWT
- **Databases:** PostgreSQL, Prisma ORM, MongoDB, Mongoose
- **Tools:** GitHub, Docker, Docker Compose, Kubernetes (manifests), Postman

PROFESSIONAL EXPERIENCE

Software Developer – Integration

04/2023 – 01/2026

Open Access Technology India Pvt. Ltd. (OATI), India

- Executed and coordinated application deployments across multiple distributed server environments (DEV, QA, Staging, UAT, Production, client instances) using OATI's proprietary deployment orchestration platform.
- Coordinated release lifecycles for builds and hotfixes; ran pre-release validation and environment checks before each rollout.
- Wrote and executed SQL validation and schema-migration scripts to verify production data integrity and resolve schema inconsistencies.
- Analyzed Linux server logs and REST API payloads (status codes, request/response bodies) to identify and clear deployment blockers; tracked deployments and defects through Git workflows and release tickets.

Intern Teaching Assistant Engineer

01/2022 – 06/2022

Geekster, India

- Supported learners in JavaScript, React.js, HTML5 and CSS3 through debugging and doubt-solving sessions.
- Explained REST API integration, responsive UI design and reusable components.

Self-directed learning and personal projects

02/2026 – Present

Refreshed JavaScript, React and data structures and algorithms; built the two projects below.

PROJECTS

Real-Time Chat Application (personal project)

08/2026 – 09/2026

Next.js (App Router), React 19, TypeScript, Node.js, Socket.IO, PostgreSQL, Prisma, NextAuth, Docker, Kubernetes

GitHub: github.com/lakshayn0001/Chat-Application

- Built a one-to-one messaging app with friend requests: a Next.js front end and a standalone Socket.IO server that delivers messages in real time through per-user rooms.
- Implemented credentials authentication with NextAuth (Auth.js v5), bcrypt password hashing and JWT sessions.
- Modeled users, messages and friend requests in PostgreSQL with Prisma, using relations and unique constraints.
- Containerized the web app and socket server with multi-stage Dockerfiles and docker-compose (PostgreSQL 16); wrote Kubernetes manifests including Deployments, Services, Ingress with WebSocket routing, PVC, ConfigMap and Secret.

AI Data Analytics Dashboard (personal project)

04/2026 – 09/2026

React.js (Vite), Node.js, Express.js, Python, MongoDB, Mongoose, Google Gemini API, Multer, Chart.js

GitHub: github.com/lakshayn0001/AI_Data_Analyst_Dashboard

- Built a full-stack tool where users upload CSV files (Express, Multer) and ask questions about the data in natural language.
- Used the Gemini API to convert each question into a structured JSON query plan (sort, group-by, average, count), executed by a Python data-processing service.
- Stored file metadata, sessions and query history in MongoDB with Mongoose; visualized results with React and Chart.js bar charts.

EDUCATION

Bachelor of Technology, Computer Science

2019 – 2023

Maharshi Dayanand University, India · University status in Anabin: H+

CERTIFICATIONS

React.js Certificate | Geekster | 2022

LANGUAGES

English: C1 · German: beginner

AVAILABILITY

Nationality: Indian · Requires visa sponsorship (EU Blue Card) · Willing to relocate to Germany · Available immediately
Open to on-site or hybrid roles in Berlin, Hamburg, Munich, Frankfurt, Cologne and other German cities
